specify the name of the image of your weapon

do not change these values

choose a damage for the weapon

no comma after the last

Do not change the text to red

9

Change the `index.html` file  
to the root

Find :  
`id="configWorld"`

Add the world to the  
control panel

Save

```
<select class="browser-default custom-select" id="configWorld">  
  
  <option value="medieval" selected>Médiéval</option>  
  <option value="forest">Forestier</option>  
  <option value="desert">Désertique</option>  
  <option value="swamp">Marécageux</option>  
  <option value="dungeon">Donjon</option>  
  <option value="myworld">My Best World</option>  
</select>
```

Add the blue line  
at the end

note here the  
name of your file

Name your world  
as you want
